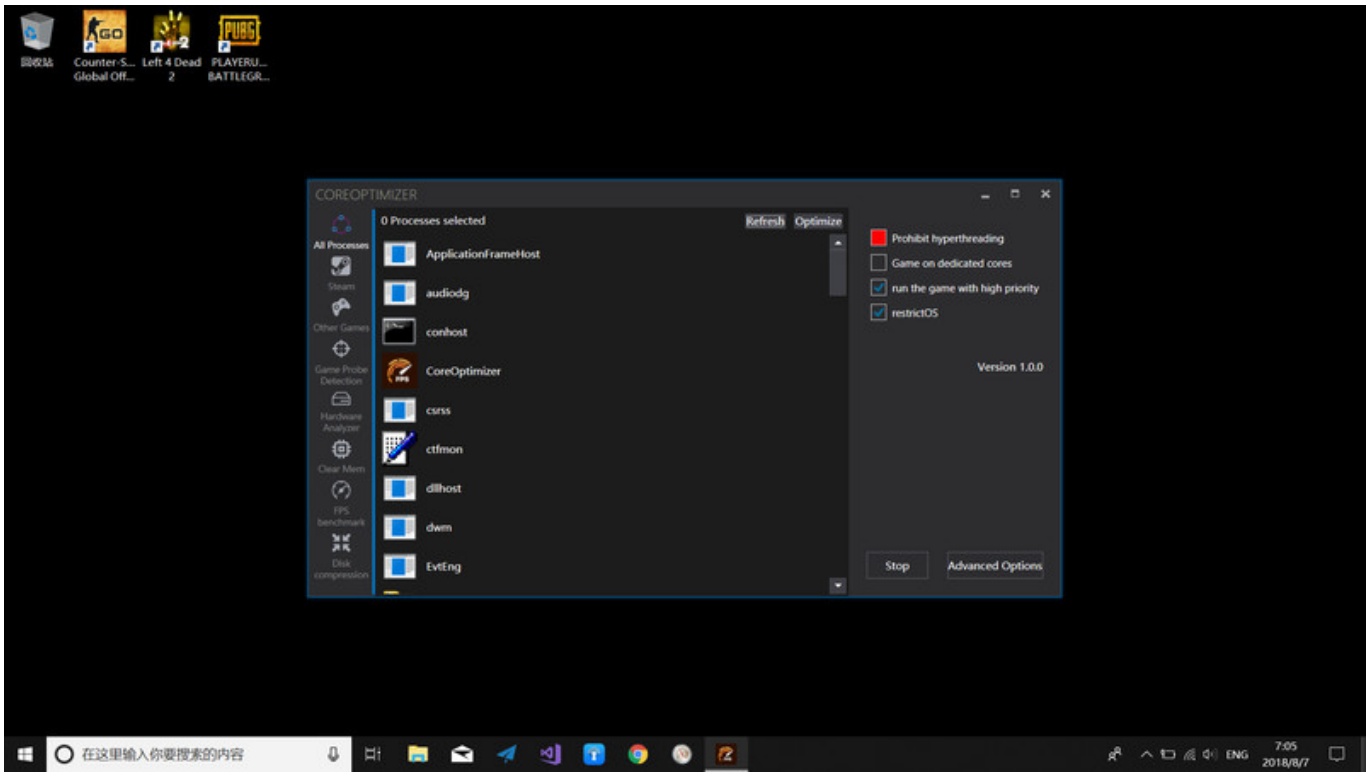
CoreOptimizer Activation Code [Xforce]



Download ->>->>->> http://bit.ly/2SL5YWt

About This Software

CoreOptimizer improves your game playing performance through optimizing your computer's hardware resource. It could also be used as a general system optimization tool.

Features

Core Optimization

- Restrict system processes to run on a single core such that all remaining cores are left for game.
- Run game with high priority.
- Run game on a single core(Suitable for single core game not optimized for multi-cores).
- Prohibit hyper-threading for game.
- Run game on designated multi-cores.
- Auto launch with OS start.
- Constrain Web browser to run on a single core.

- Filter applications to not be restricted to single core.
- Run any streaming software on designated core.
- Restrict the priority of any streaming software.
- List of processes to select for optimization.
- Kill selected process.
- Copy a process's PID to be used in Memory Clean.
- Stop optimization.

Game Utility(including Steam, non-Steam games and applications)

- Auto detection of all Steam games to be launched for optimization.
- Manually add any game or application for optimization.
- Auto detection of designated games for optimization.
- Steam Store and Community link.
- Favorite your game.
- Add launch options of Steam game.
- Customize display name of Steam game.
- Change display image of any game or application.

Memory Cleaning

- Used memory in GB.
- Memory footprint in %.
- One key press to clean memory for all processes.
- List of statistic data after memory cleaning.
- Chart display of the memory uses in real time.

Hardware Analyzer

- List all the resources belonging to your computer, including CPU, GPU, RAM, OS, Motherboard, HDD, Optical Drives, Audio, and Network etc.

FPS Benchmark

- Paste copied PID for fps tracking of the process.
- Auto detection of all windows belonging to the game launched within CoreOptimizer.
- Select the detected game window for benchmark.
- One key press to start FPS tracking.
- Show real time FPS in the tracked game window.
- Chart display of FPS data for statistic analysis.

Disk Compression

- Four compression method.
- Batch compression of all Steam games.
- Select a folder for compression.
- Compress the selected folder.
- Decompress the selected folder.
- List all compressed folders.

System tray

- Show/hide the window.
- Auto remember latest played 5 games.
- Stop optimization.
- Recover window position

Title: CoreOptimizer
Genre: Utilities
Developer:
Nincent
Publisher:
Nincent
Release Date: 16 Oct, 2018

a09c17d780

Minimum:

OS: Windows 7 64 bit, Windows 8/8.1 64 bit, Windows 10 64 bit

Processor: Any CPU

Memory: 1 GB RAM

English,French,Italian,German,Danish,Ukrainian,Russian,Bulgarian,Hungarian,Turkish,Greek,Norwegian,Czech,Japanese,Polish,Thai,Swedish,Simplified Chinese,Traditional Chinese,Romanian,Finnish,Dutch,Port

Enable Your streaming software
This option allows you to restrict your stream software to operate on these cores only. Please enter the name of your streaming software here:
obs.exe
Note: Please make sure your stream software is running before enabling CoreOptimizer.
Enabling this will lower the CPU usage priority of your streaming software thus allowing your game to petentially take CPU power away from your streaming software for the game itself. This may result in higher FPS for your game but but streaming quality reduction.
